Toyosu, Tokyo
#teamLabPlanets

teamLab Planets is a museum where you walk through water. It consists of 4 vast exhibition spaces with 7 distinct artworks. The artworks are based on art collective teamLab's concept of "Body Immersive".

By immersing the entire body with other people in these massive "Body Immersive" artworks, the boundary between the body and the artwork dissolves, the boundaries between the self, others, and the world become something continuous, and we explore a new relationship without boundaries between ourselves and the world.

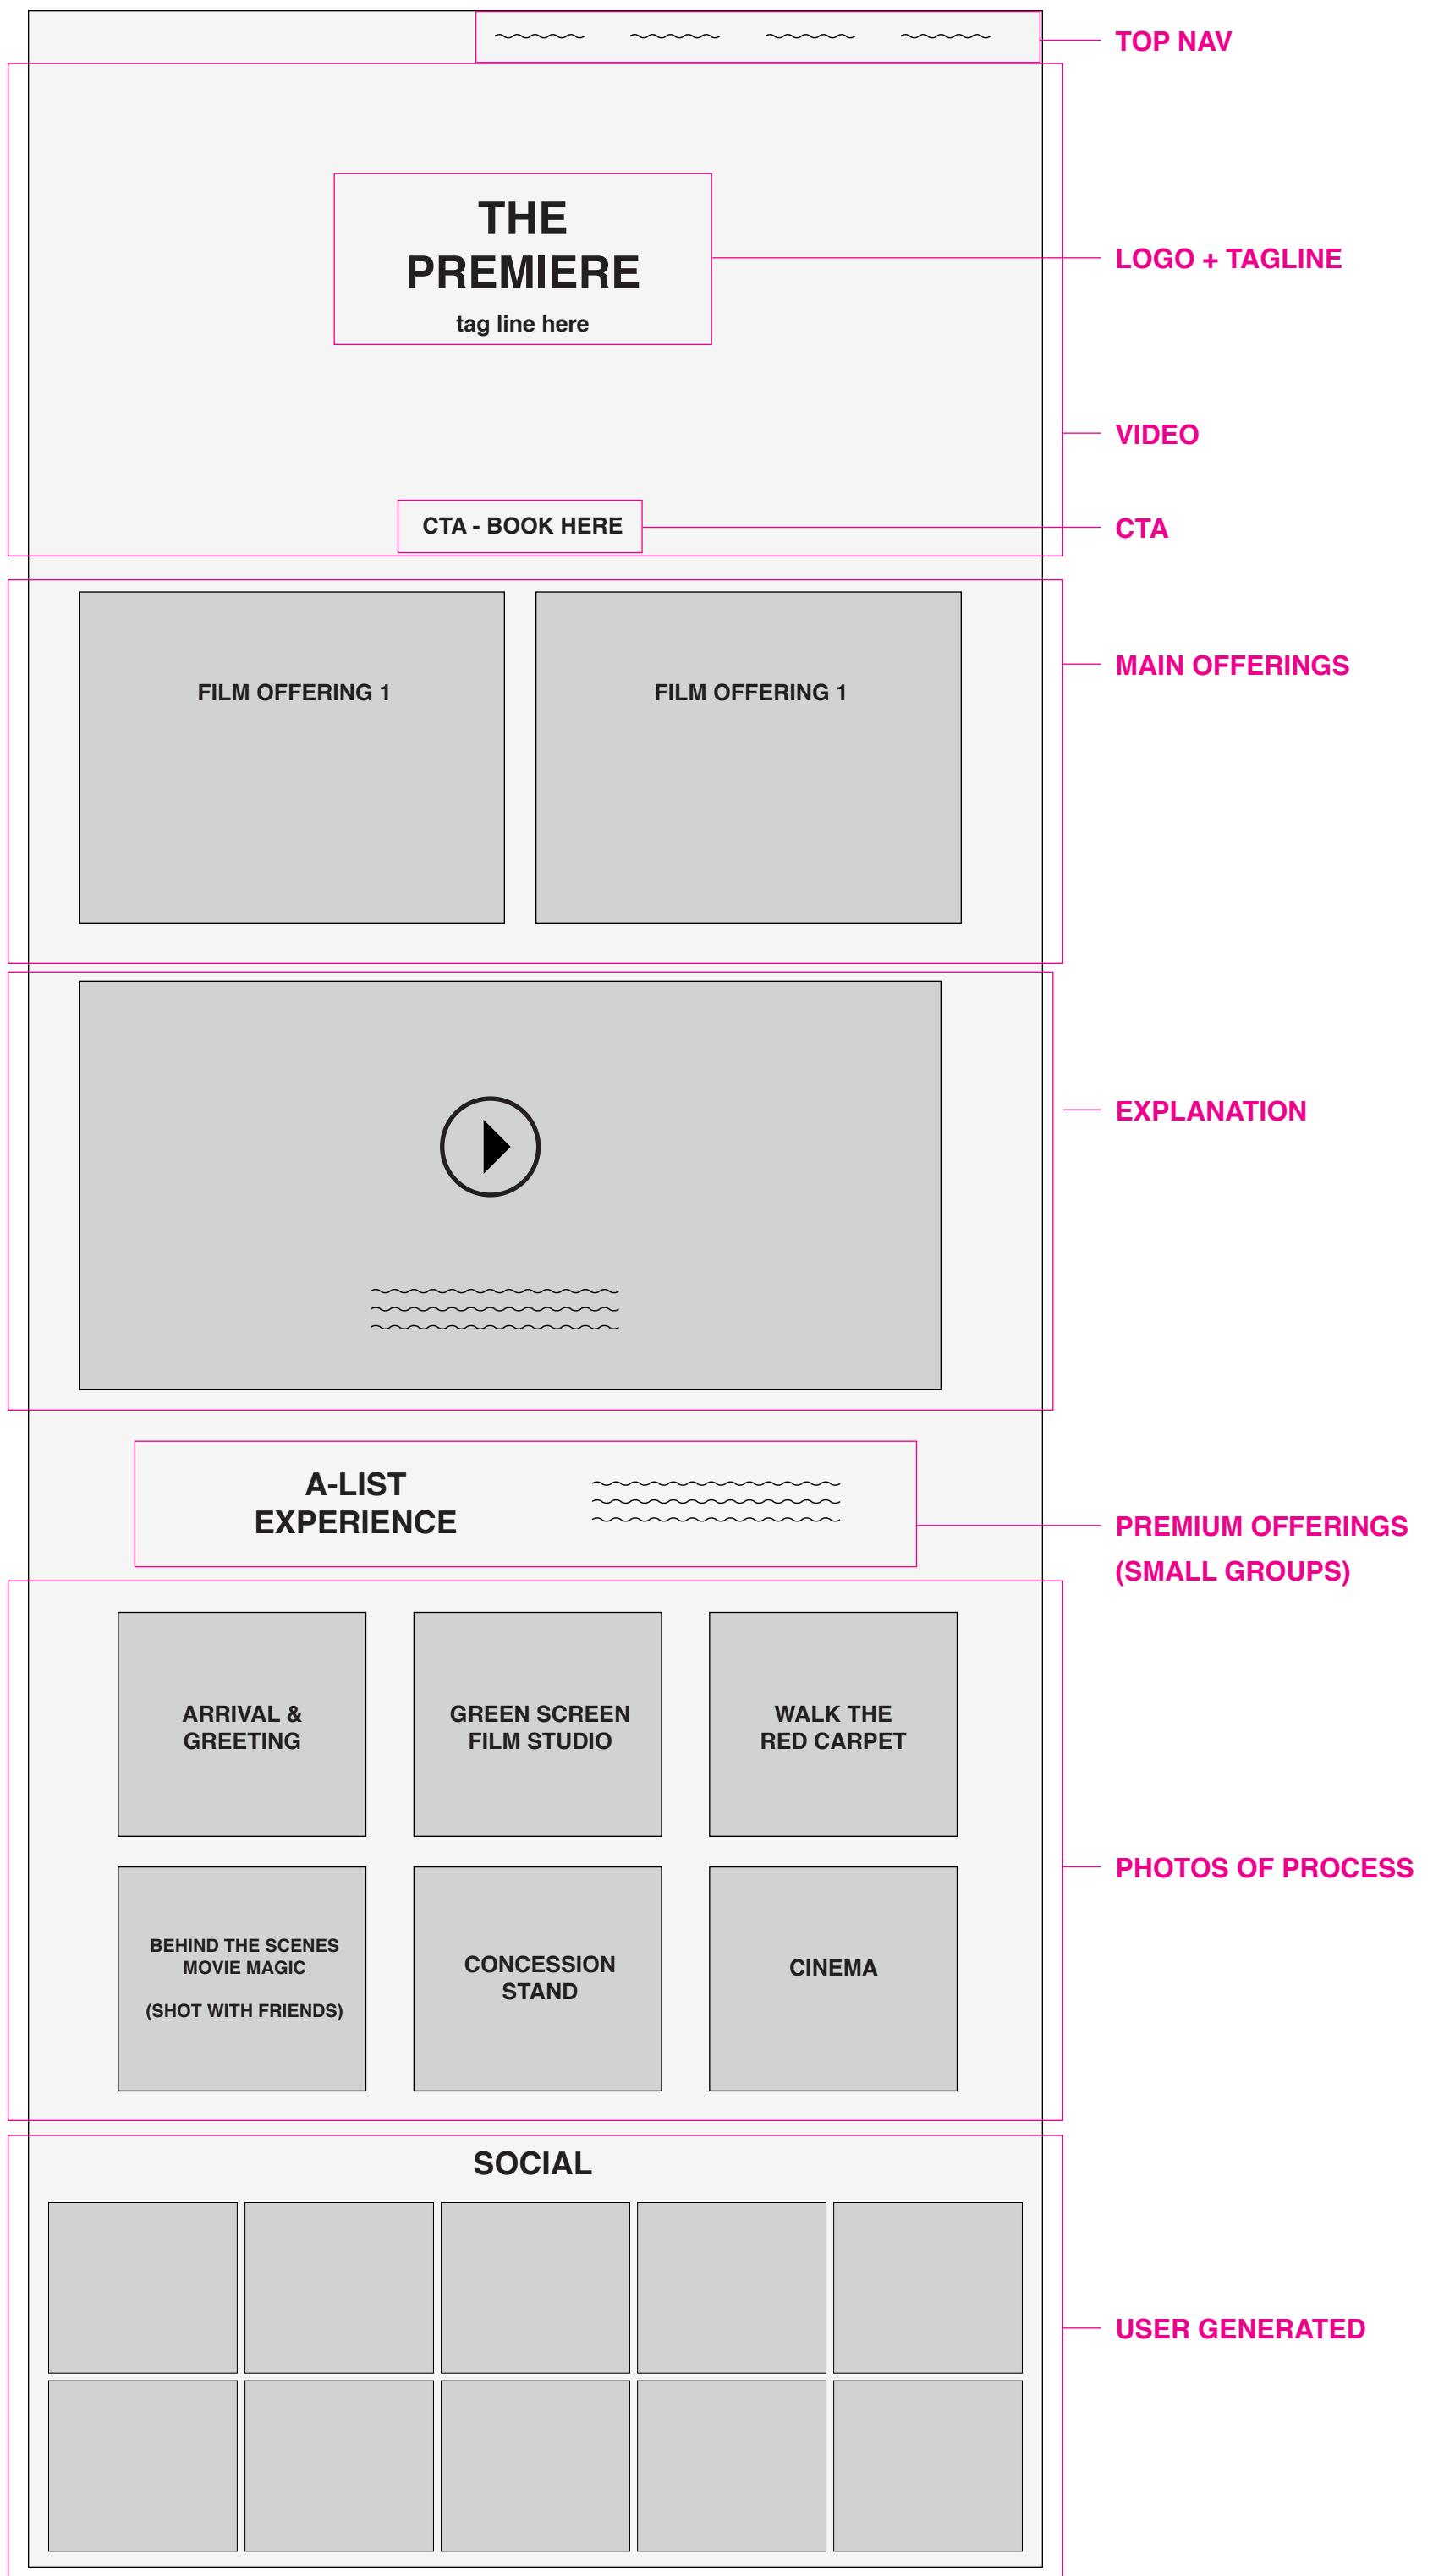

Visitors enter the museum barefoot, and become completely immersed with other visitors in the vast artwork spaces.
